

# Muppets on a Clocktower

Almanac (2.0)

By Patrick & Josie

# Muppets on a Clocktower

Version 2.0

by Patrick & Josie

## TOWNSFOLK

### BUNSEN HONEYDEW

You start knowing how many characters are in play that can create Humans.

### PEPE THE PRAWN

You start knowing which Demons are in play.

### KERMIT THE FROG

Each night\*, choose a player (not yourself): a Human, if chosen, becomes a Townsfolk.

### SWEETUMS

Each night\*, you learn how many evil players voted today.

### THE GREAT GONZO

Each night\*, you may choose a player: if you choose a Minion they die, if you choose a Townsfolk you die.

### FOZZIE BEAR

Each day, you may make a public joke. Wocka! Wocka! Tonight, you learn if it was true.

### DR. TEETH

If the Demon kills you, a Human becomes a Townsfolk: you learn who.

### ROWLF THE DOG

You start knowing 2 players who are not Townsfolk.

### SAM THE EAGLE

Each night, you learn how many steps from you to an alive evil player. [+1 Human]

### CAMILLA THE CHICKEN

Each night\*, if a player died by execution today: you learn a player of their alignment.

### SWEDISH CHEF

Each night\*, you learn if there are more or less Humans than last night. If you were non-verbal on the 1st day, you instead learn how many Humans are in play.

### RIZZO THE RAT

Each night\*, choose a player: if they are killed by the Demon tonight, you learn an alive character.

### BEAKER

If you were non-verbal on the 1st day, that night you learn the characters of players who were non-verbal (up to 4) & one character which is not in play.

## OUTSIDER

### LONG JOHN SILVER

Each night\*, one player who voted on you that day might die, even if you are dead.

### CAMERAMAN

If you communicate verbally on the 1st day, a Townsfolk might become Human immediately.

### SCROOGE

Each night, if a player chooses another player, they might target you instead.

### HUMAN

You do not know you are a Human. You think you are a Townsfolk character, but you are not.

## MINION

### CRAZY HARRY

Each night\*, choose a player: the 1st Outsider you choose becomes evil. [+1 Outsider]

### CONSTANTINE

Each night\*, you may choose 2 players (not a Demon): they swap characters but their abilities do not refresh.

### ANIMAL

Once per game, at night\*, choose a player: they die. If you were non-verbal on the 1st day, one of their Townsfolk neighbours becomes Human.

### SCOOTER

If there are 5 or more players alive, once per day, you may choose to take a player off the block.

## DEMON

### MISS PIGGY

Each night\*, choose a player: they die. Townsfolk chosen by Kermit the Frog might become Human instead. [+ Kermit the Frog]

### UNCLE DEADLY

Each night\*, choose a player: they die. Townsfolk who nominate you become Human immediately.

### STATLER

Each night\*, wake with Waldorf, together choose one player: they die. [+ Waldorf, -1 Minion]

### WALDORF

Each night\*, wake with Statler, together choose one player: they die. [+ Statler]

**NON-VERBAL:** Communicating without using real words. Gestures, noises, pointing, and names when online, are all non-verbal.

**AM I A MAN OR AM I A MUPPET?:** Various abilities can change characters between being Human and a Townsfolk. As a Human, they continue to be treated as if they are the Townsfolk they believe themselves to be but their ability doesn't work and they may receive false information. They are not told of any change of character.

# Muppets on a Clocktower

Version 2.0

by Patrick & Josie

## NIGHT ONE

### Minion Info

### Demon Info

Bunsen Honeydew

Rowlf The Dog

Pepe The Prawn

Sam The Eagle

## OTHER NIGHTS

The Great Gonzo

Rizzo The Rat

Animal

Crazy Harry

Constantine

Miss Piggy / Statler & Waldorf / Uncle Deadly

Long John Silver

Kermit The Frog

Dr. Teeth

Sam The Eagle

Camilla The Chicken

Sweetums

Fozzie Bear

Beaker

Swedish Chef

## TRAVELERS

**BIG BIRD**

You are the tallest player.

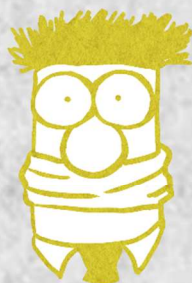

**COOKIE MONSTER**

All players must share their snacks with you.

**COUNT VON COUNT**

You conduct and count each vote.

### NON-VERBAL

Some of the characters have abilities which interact with being non-verbal on the 1st day. Being non-verbal means communicating without using real words. Gestures, noises, and pointing all count as non-verbal. Player names can be used when playing online.

### AM I A MAN OR AM I A MUPPET?

The main source of misinformation in this script comes from Humans hidden among the Muppets. The Human Outsider functions exactly like the "Drunk" in Trouble Brewing, except that a Townsfolk might be turned into a Human, or a Human might be turned into a Townsfolk, through different characters' abilities. If a Townsfolk is turned into a Human they are not informed of this. If a Human is turned into a Townsfolk they are not told of the change, and they become the Townsfolk they believe themselves to be.

### GREEN AND PINK

On this script good characters have green tokens and evil characters have pink tokens.

# BUNSEN HONEYDEW

TOWNSFOLK

You start knowing how many characters are in play  
that can create Humans.

*“Science has left me a sad and lonely man.”*

## HOW TO RUN

Count how many of the following characters are in play: **Sam the Eagle**, **Cameraman**, **Animal**, **Miss Piggy**, **Uncle Deadly**.

During the first night, wake **Bunsen Honeydew**. Show **Bunsen Honeydew** fingers (0, 1, 2, etc.) equalling the number of the above characters that are in play. Put **Bunsen Honeydew** to sleep.

## EXAMPLES

**Sam the Eagle** is in play and has therefore added a Human into play. On the first night, **Bunsen Honeydew** learns a 1.

**Animal** and **Uncle Deadly** are in play. On the first night, **Bunsen Honeydew** learns a 2. On the first day, **Animal** communicates verbally and therefore cannot create **Humans**. **Bunsen Honeydew** is not informed that the number of characters that can create **Humans** has changed.

In a 12-player game the base Outsider count is 2. The Storyteller decides to put the **Cameraman** and **Sam the Eagle** tokens in the bag but to make **Sam the Eagle** the starting **Human** Outsider. **Bunsen Honeydew** learns a 1 due to **Cameraman**.

-

# ROWLF THE DOG

TOWNSFOLK

You start knowing 2 players who are not  
Townsfolk.

*“Why does everyone always blame dogs?”*

## HOW TO RUN

While preparing the first night, put **Rowlf the Dog**'s NOT TOWNSFOLK reminder token by any two players that are an Outsider, Minion, or Demon.

During the first night, wake **Rowlf the Dog** and point to the two players. Put **Rowlf the Dog** to sleep.

## EXAMPLES

John is **Long John Silver** and Simon is **Crazy Harry**. **Rowlf the Dog** learns that John and Simon are not Townsfolk.

Sam thinks he is **Fozzie Bear** but he is actually **Human**. On the first night, **Rowlf the Dog** learns that Sam is not a Townsfolk. On night two, Sam is chosen by **Kermit the Frog** and is turned into a Townsfolk. **Rowlf the Dog** does not learn anything more.

# PEPE THE PRAWN

TOWNSFOLK

You start knowing which Demons are in play.

*“I am not a shrimp – I am a king prawn, okay!”*

## HOW TO RUN

During the first night, wake **Pepe the Prawn** show them the character tokens of the Demons that are in play. Put **Pepe the Prawn** to sleep.

## EXAMPLES

Jake is **Miss Piggy**. **Pepe the Prawn** learns that **Miss Piggy** is in play.

**Statler** and **Waldorf** are the Demons in play. On the first night, Pepe the Prawn is shown both tokens.

# SAM THE EAGLE

TOWNSFOLK

Each night, you learn how many steps  
from you to an alive evil player. [+1 Human]

*“At times like these, I am proud to be an American.”*

## HOW TO RUN

While setting up the game, add the normal amount of Townsfolk character tokens to the bag. While preparing the first night, put the HUMAN reminder token by any Townsfolk character token, that player is now a **Human**. There can be two **Humans** in play at the start of the game if one is added by **Sam the Eagle** and one is already in play (due to being added by the base Outsider count).

Each night, wake **Sam the Eagle**. Show them fingers (0, 1, 2, etc.) equalling the distance from **Sam the Eagle** to an alive evil player. Put **Sam the Eagle** to sleep.

The evil player shown does not have to be the same as the previous night. The number of steps does not need to be the shortest, nor does it need to be counted in a particular direction.

## EXAMPLES

**Sam the Eagle** learns a 5 as **Constantine** is sat 5 seats away. The next day **Constantine** is executed and dies. The following night, **Sam the Eagle** must learn a new number as **Constantine** is no longer alive and the other player sat 5 seats away is good. **Sam the Eagle** learns a 1 as their neighbour is **Uncle Deadly**.

Clockwise sitting next to **Sam the Eagle** is **Crazy Harry** and anti-clockwise is a Townsfolk. On the first night **Sam the Eagle** learns a 1. During the day, **Sam the Eagle**'s Townsfolk neighbour is executed and dies. That night, **Sam the Eagle** learns a 3 which corresponds to a different evil player sat 3 seats away from him.

It is a 10-player game. Clockwise from **Sam the Eagle** sits **Rowlf the Dog** and then **Statler**. On the first night **Sam the Eagle** learns a 2, corresponding to **Statler**. On night 3 **Sam the Eagle** learns an 8, still corresponding to **Statler** but this time counted anti-clockwise.

# KERMIT THE FROG

TOWNSFOLK

**Each night\*, choose a player (not yourself): a Human, if chosen, becomes a Townsfolk.**

*"It's nice to be important, but it's important to be nice."*

## HOW TO RUN

Each night except the first, wake **Kermit the Frog**. Prompt **Kermit the Frog** to point at any player (if they point at themselves, shake your head no and prompt them to point at another player). Put **Kermit the Frog** to sleep.

If a Human was chosen, remove the HUMAN reminder token: the chosen player is now the Townsfolk they believe they are. **Kermit the Frog**, and the player that changes, do not learn this.

If a non-Human is chosen, nothing happens.

If **Miss Piggy** is in play, place **Miss Piggy's** CORRUPTED token next to **Kermit the Frog**.

Townsfolk chosen by **Kermit the Frog** might turn into a **Human**, it is the Storyteller's choice, but **Humans** chosen by **Kermit the Frog** *must* still turn into Townsfolk.

As this corruption is an evil ability, generally Storytellers should help the evil team with this.

## EXAMPLES

On night two, **Kermit the Frog** selects Jim. Jim was a **Human** who thought they were **Sweetums**, and so Jim becomes **Sweetums** and therefore learns correct information later that night. Neither Jim nor **Kermit the Frog** are told of this change.

**Kermit the Frog** selects a player who is a Townsfolk. **Miss Piggy** is in play, so the Storyteller decides to turn the selected player into a **Human**.

**Kermit the Frog** selects a **Human** while **Miss Piggy** is in play. That player is turned into the Townsfolk they believed themselves to be.

# CAMILLA THE CHICKEN

TOWNSFOLK

Each night\*, if a player died by execution today: you learn a player of their alignment.

*“BAWK BAWK BAWK! BAWK BAWK.”*

## HOW TO RUN

If a player dies by execution, put **Camilla the Chicken's** EXECUTED TODAY reminder token by the executed player's character token.

Each night except the first, if a player died by execution, wake **Camilla the Chicken** that night. Point at a player who is the same alignment as the player marked EXECUTED TODAY. Put **Camilla the Chicken** to sleep. Remove the reminder token when convenient.

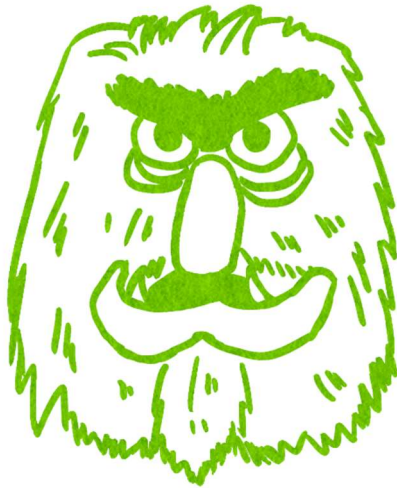

## EXAMPLES

It is the third night and **Animal** was executed today. **Camilla the Chicken** is pointed at Jasmine, who is an evil Minion **Scooter**.

**Bunsen Honeydew**, a good character, is executed and dies. That night, **Camilla the Chicken** is woken and Edward is pointed at. Edward is **Constantine**, whose ability can make them register as good.

On the second day, the vote ties and no one is executed. **Camilla the Chicken** does not wake that night.

The evil Outsider **Scrooge** is executed. There is only one living evil player, so the Storyteller decides to point to the evil Minion **Animal** who is already dead.

# SWEETUMS

TOWNSFOLK

**Each night\*, you learn how many evil players voted today.**

*“Excuse me Mr. Price, can I give you a hand? (takes off hand)”*

## HOW TO RUN

Each day, if an evil player votes for any execution, place an EVIL VOTED reminder token next to them. If they vote on multiple executions, it still only counts as one.

Each night except the first, count the number of EVIL VOTED reminder tokens and then wake **Sweetums**. Show them fingers (0, 1, 2, etc.) equalling the number of evil players who voted. Then, put **Sweetums** to sleep.

Each dawn, remove all EVIL VOTED reminder tokens from the Grimoire.

If you forget whether an evil player voted or not, wake them at night and ask by showing them the DID YOU VOTE TODAY? info card. They must answer honestly, then go to sleep.

## EXAMPLES

There was one nomination today. Lots of players voted, including the evil Minion **Crazy Harry** and the evil Outsider **Cameraman**. That night, **Sweetums** learns a 2.

There were 3 nominations today. The Minion **Constantine** voted during the second nomination. No other evil players voted. Nobody was executed. That night, Sweetums learns a 0 as **Constantine** registers as good due to their ability.

There were no nominations today. A Traveller was exiled, and all players raised their hand to support the exile. That night, Sweetums learns a 0. (Exiles are never affected by abilities).

# SWEDISH CHEF

TOWNSFOLK

Each night\*, you learn if there are more or less Humans than last night. If you were non-verbal on the 1<sup>st</sup> day, you instead learn how many Humans are in play.

*“Herdy dur shur floompty. Bort, bort, bort!”*

## HOW TO RUN

On the first day, observe if **Swedish Chef** is non-verbal and place the NON-VERBAL reminder token next to them if they were.

Each night except the first, look to see if there has been a change in the number of **Humans** in play. Wake **Swedish Chef** and give a thumbs up if there are more **Humans**, a thumbs down if there are less **Humans**, and a thumb to the side if there has been no change.

If the NON-VERBAL reminder token is next to them, instead wake **Swedish Chef** and show them fingers (0, 1, 2, etc.) equalling the number of **Humans** in play. Put **Swedish Chef** to sleep.

If you forget whether they were non-verbal or not, wake them at night and ask by showing them the NON-VERBAL fabled token. They must answer honestly, then go to sleep.

## EXAMPLES

On the first day, **Swedish Chef** spoke exclusively in weird noises and was marked with the NON-VERBAL reminder token. That night, **Swedish Chef** was woken and shown a 0 as there are no **Humans** in play.

At the start of the game there is 1 **Human** in play due to the Outsider count. On the first day **Swedish Chef** communicated verbally. **Uncle Deadly** was nominated by a Townsfolk, which turned them into a **Human**. There is one more **Human** in play than previously, so that night **Swedish Chef** is woken and shown a thumbs up.

On night two, **Kermit the Frog** chose the only **Human** and turned them into a Townsfolk. Later that night, **Swedish Chef** was woken and shown either a 0 if they are marked with the NON-VERBAL reminder token, or a thumbs down if they communicated verbally on day 1.

# THE GREAT GONZO

TOWNSFOLK

**Each night\*, you may choose a player: if you choose a Minion they die, if you choose a Townsfolk you die.**

*"Tonight ladies and gentlemen, I will eat this rubber tire to the music of The Flight of the Bumblebee...music, maestro!"*

## HOW TO RUN

Each night except the first, wake **The Great Gonzo**. They either shake their head no or point at any player. Put **The Great Gonzo** to sleep.

If they shake their head no, nothing happens.

If **The Great Gonzo** chose a player, check the chosen player's character type. If a Minion was chosen that player dies: mark them with the DIED TONIGHT reminder token. If a Townsfolk was chosen **The Great Gonzo** dies: mark them with the DIED TONIGHT reminder token.

If an Outsider or a Demon was chosen, nothing happens.

## EXAMPLES

On the second night, **The Great Gonzo** wakes but chooses not to act. On the third night, they choose **Scooter**. **Scooter** is a Minion so **Scooter** dies in the night.

On the second night, **The Great Gonzo** points to a Townsfolk. **The Great Gonzo** dies.

**The Great Gonzo** chooses **Animal**. The Storyteller decides to use **Scrooge**'s ability to make **The Great Gonzo** target **Scrooge** instead. **Scrooge** is an Outsider and so nothing happens.

# RIZZO THE RAT

TOWNSFOLK

**Each night\*, choose a player: if they are killed by the Demon tonight, you learn an alive character.**

*“He died?! And this is supposed to be a kids movie!”*

## HOW TO RUN

Each night except the first, wake **Rizzo the Rat**. **Rizzo the Rat** points at any player. Put **Rizzo the Rat** to sleep. Put **Rizzo the Rat**'s CHOSEN reminder token by the chosen player's character token.

If the chosen player is killed by the Demon tonight, wake **Rizzo the Rat** and show them an alive in-play character token. If the chosen player is not killed in the night, or dies to another ability, **Rizzo the Rat** is not woken.

At dawn, remove the CHOSEN reminder token.

## EXAMPLES

On the second night, **Rizzo the Rat** chose Sarah who is playing **Beaker**. Later that night, Sarah is chosen by the Demon and dies. **Rizzo the Rat** is then woken and shown the **Kermit the Frog** token, because that character is alive and in play.

**Rizzo the Rat** selects **The Great Gonzo**. **The Great Gonzo** uses their ability and selects a Townsfolk. They die due to their own ability and so **Rizzo the Rat** is not woken.

# FOZZIE BEAR

TOWNSFOLK

**Each day, you may make a public joke. Wocka! Wocka!**  
**Tonight, you learn if it was true.**

*“Did I tell you the one about the man with the light bulb in his nose? He was lightheaded! Get it? Wocka Wocka!”*

## HOW TO RUN

Each day, **Fozzie Bear** may make a public statement about the game in the form of a joke. These jokes do not have to be good, funny, nor verbal but should end with **Fozzie Bear’s** classic catchphrase “Wocka! Wocka!”. If **Fozzie Bear’s** statement is true, place the TRUE reminder token next to their character token.

Each night except the first, if **Fozzie Bear** made a public joke today, wake them and either nod your head if their joke was true, or shake your head if their joke was false.

Storytellers should interpret the joke to the best of their ability, but provide no clarification on how they understood the joke during the game.

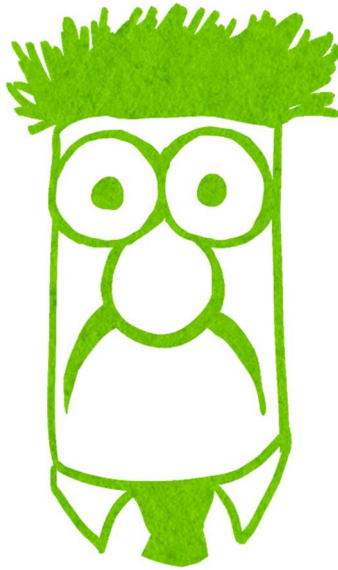

If players are bluffing as **Fozzie Bear**, it is helpful to stand by the Grimoire and pretend to move tokens and listen to their jokes.

## EXAMPLES

During the day, **Fozzie Bear** jokes “Did you hear the one about how Janet is the Demon? Wocka Wocka!” Janet is the Demon. Despite no one laughing, **Fozzie Bear** is still woken up and told that their joke was true.

On the first day, **Fozzie Bear** is attempting to be non-verbal. **Fozzie Bear** raises their hand, points at two players, gives a thumbs down with an angry face, and then says “Wocka Wocka!”. The Storyteller interprets that Fozzie Bear is joking that both players are evil. That night, The Storyteller wakes Fozzie Bear and shakes their, as both players are good.

During the day, **Fozzie Bear** jokes “What do Ned and Katie have in common? They’re on the same team! Wocka Wocka!”. That night Ned, who is **Long John Silver**, is selected by **Crazy Harry** and turns evil. However, at the time of the joke, both Ned and Katie were good so **Fozzie Bear** still learns that their joke was true.

## BEAKER

TOWNSFOLK

If you were non-verbal on the 1<sup>st</sup> day, that night you learn the characters of players who were non-verbal (up to 4) & one character which is not in play.

*“Meep meep meep!”*

## HOW TO RUN

On the first day, observe if **Beaker** is non-verbal and place **Beaker**'s NON-VERBAL reminder token next to them if they were. Also look to see who else is being non-verbal and mark them with the same reminder tokens.

The second night, if **Beaker** was non-verbal, select up to 4 players who were also non-verbal. Wake **Beaker** and show them the chosen players' character tokens and one not-in-play character token. Put **Beaker** to sleep. If **Beaker** communicated verbally then they do not wake.

If you forget who was non-verbal or not, wake them at night and ask by showing them the NON-VERBAL fabled token. They must answer honestly, then go to sleep.

## EXAMPLES

During the first day, **Beaker** communicated exclusively in meeps and so was successful in being non-verbal. **Dr. Teeth**, **Cameraman**, **Animal**, **Statler**, **Pepe the Prawn**, and a **Human** were also non-verbal. That night, **Beaker** is shown **Dr. Teeth**, **Cameraman**, **Animal**, **Human**, and one of the Demon's bluffs: **Sweetums**.

During the first day there are 3 players that are non-verbal; **Beaker**, a **Human** who believes they are **Kermit the Frog**, and **Swedish Chef**. That night, **Beaker** is shown **Beaker**, **Swedish Chef**, and **Kermit the Frog**.

During the first day, **Beaker** accidentally answers verbally when asked a question. That night they learn nothing.

## DR. TEETH

TOWNSFOLK

If the Demon kills you, a Human becomes a Townsfolk:  
you learn who.

*“This staccato tune is posolutely, most transparently bringing me down!”*

### HOW TO RUN

If **Dr. Teeth** was killed by the Demon in the night, choose a player that is a **Human** and turn them into the Townsfolk they thought they were. Wake **Dr. Teeth** and point at the changed player. If there are no **Humans** in play, instead wake Dr. Teeth and shake your head no. Put Dr. Teeth to sleep.

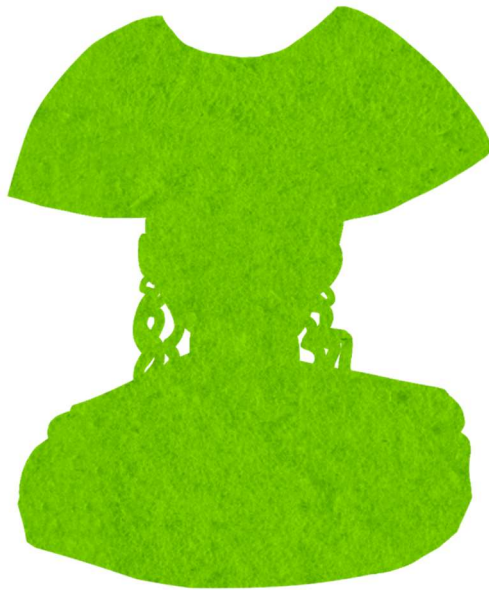

### EXAMPLES

During the night, the Demon selects to kill **Dr. Teeth**. Mark is a **Human** who received the **Fozzie Bear** token, so they are turned into **Fozzie Bear**. **Dr. Teeth** is woken and pointed to Mark.

During the night, **Animal** selects **Dr. Teeth**, which means that **Dr. Teeth** dies. **Dr. Teeth** was not killed by the Demon and therefore nothing happens.

During the night, the Demon kills **Dr. Teeth**. There are no **Humans** in play. **Dr. Teeth** is woken and told no.

# LONG JOHN SILVER

OUTSIDER

Each night\*, one player who voted on you that day might die, even if you are dead.

*“Upstage, lads. This is my only number!”*

## HOW TO RUN

Each day, if **Long John Silver** is nominated, mark anyone who votes on them with one of **Long John Silver**'s VOTED reminder tokens. That night, you may kill one of the people who voted by placing **Long John Silver**'s DIED TONIGHT reminder token next to their character token.

## EXAMPLES

There are 2 nominations on day 1. **Long John Silver** is the second nomination. **Beaker**, **Fozzie Bear**, and **Animal** vote on them. **Beaker** dies that night.

During the day, **Long John Silver** is nominated and a majority of players vote to kill them. **Long John Silver** is executed and dies. The Storyteller chooses to kill one of the players who voted on **Long John Silver**'s execution.

There are 4 players alive. A Minion nominates the dead **Long John Silver** and is the only vote. That night, the Demon kills a player and so the Storyteller decides not to kill the Minion because it would end the game.

## SCROOGE

OUTSIDER

**Each night, if a player chooses another player, they might target you instead.**

*“Who was the wretched man whose death brought so much glee and happiness to others?”*

### HOW TO RUN

During the night, whenever a player targets another player with their ability, you can instead choose for them to target **Scrooge**. You can use the SCROOGED reminder token to indicate that they targeted **Scrooge** instead. Do not tell the affected player that they have instead targeted **Scrooge**.

Characters that target others include: **Kermit the Frog**, **The Great Gonzo**, **Rizzo the Rat**, **Crazy Harry**, **Constantine**, **Animal**, and all the Demons.

### EXAMPLES

In the night, the Demon chooses to kill **Dr. Teeth**. The Storyteller chooses for it to target **Scrooge** instead, and so **Scrooge** dies.

At night, **The Great Gonzo** chooses a Minion, which would kill the Minion. Instead, they target **Scrooge**, an Outsider, so their **The Great Gonzo**'s ability does nothing.

At night, the Demon kills **Scrooge**. **Rizzo the Rat** originally chose a different player but the Storyteller decides that **Rizzo the Rat** targets **Scrooge** instead. Because **Scrooge** was chosen by Rizzo the Rat, and **Scrooge** was killed by the Demon, **Rizzo the Rat** learns an alive character.

# CAMERAMAN

OUTSIDER

If you communicate verbally on the 1<sup>st</sup> day, a Townsfolk might become Human immediately.

“ ... ”

## HOW TO RUN

On the first day, observe if **Cameraman** is non-verbal or not. If they communicate verbally, you can immediately make one Townsfolk a **Human**.

If you forget if they were non-verbal or not, wake them at night and ask by showing them the NON-VERBAL fabled token. They must answer honestly, then go to sleep.

## EXAMPLES

During the first day, **Cameraman** accidentally answers verbally when asked a question. The Storyteller decides to immediately turn **Fozzie Bear** into a **Human**. The **Cameraman** is executed and dies. The **Human** remains in play.

During the first day, **Cameraman** communicates only in weird noises and gestures and is therefore non-verbal. Nothing happens.

During the first day, the **Cameraman** speaks verbally. The Storyteller decides not to create a **Human**.

# HUMAN

OUTSIDER

**You do not know you are a Human. You think you are a Townsfolk character, but you are not.**

*“Am I a man? Or am I a Muppet?”*

## HOW TO RUN

While setting up the game, before putting character tokens in the bag, remove the **Human** token and add a Townsfolk character token. Add the **Human's** HUMAN reminder token to the Grimoire. Put the swapped Townsfolk character token in the bag, not the Human character token.

While preparing the first night, put the **Human's** HUMAN reminder token by any Townsfolk character token, changing that player's character to a **Human**. They are now an Outsider, and do not have the ability of this Townsfolk character. (But they think they do.)

During the game, act as if the **Human** is actually this Townsfolk character. (If that character would wake to act at night, the **Human** wakes to act. If their ability would give them information, you can give false information to them if you wish.)

If a Townsfolk is turned into a **Human** they are not told of the change. If a **Human** is turned into a Townsfolk they are not told, and they become the Townsfolk they believe themselves to be.

## EXAMPLES

The Demon is **Miss Piggy**. A **Human**, who thinks they are **Pepe the Prawn**, learns that **Uncle Deadly** is in play.

A **Human**, who thinks they are **The Great Gonzo**, chooses a Minion. Nothing happens.

A **Human**, who thinks they are **Fozzie Bear**, is chosen by **Kermit the Frog**. They become **Fozzie Bear** and do not learn of this change.

# CRAZY HARRY

MINION

**Each night\*, choose a player: the 1st Outsider you choose becomes evil. [+1 Outsider]**

*“Heh, heh—Did somebody say... BOMB !?”*

## HOW TO RUN

While setting up the game, before putting character tokens in the bag, add one extra Outsider character token and remove one Townsfolk character token.

Each night except the first, wake **Crazy Harry**. **Crazy Harry** points at any player. Put **Crazy Harry** to sleep.

If **Crazy Harry** chose an Outsider mark them with the TURNS EVIL reminder token, and wake the Outsider to inform them of their alignment change by showing them the YOU ARE info token then giving a thumbs down. Turn their character token upside down. (This shows they are now evil.)  
If Crazy Harry chooses a player that is not an Outsider nothing happens.

Continue to wake **Crazy Harry** on subsequent nights even after they turn an Outsider evil, but do not turn anymore Outsiders evil.

## EXAMPLES

On the second night, **Crazy Harry** chooses a **Human** who turns evil. On the third night, **Crazy Harry** chooses **Cameraman** but, because an Outsider has already turned evil, nothing happens.

For multiple nights Crazy Harry has only chosen Townsfolk. The Storyteller chooses to use **Scrooge**'s ability to make **Crazy Harry** target **Scrooge**. **Scrooge** now turns evil.

Helen is playing **Long John Silver** and Tom is **Sam the Eagle**. One night, **Crazy Harry** chooses Helen, turning them evil. Later that same night, **Constantine** swaps Helen and Tom. Helen is now an evil **Sam the Eagle** and Tom is a good **Long John Silver**.

# CONSTANTINE

MINION

**Each night\*, you may choose 2 players (not a Demon): they swap characters but their abilities do not refresh.**

**You might register as good, and as Kermit the Frog, even if dead.**

*“My name will go down as the greatest thief of all time!”*

## HOW TO RUN

Each night except the first, wake **Constantine**. **Constantine** either shakes their head no, or points to two players, neither of which can be the Demon. (If Constantine points at a Demon, shake your head no and prompt them to point at another player.) Put **Constantine** to sleep.

If **Constantine** pointed to two players, swap the character tokens of the chosen players. One at a time, wake each swapped player, show them the YOU ARE info token and their new character token, then put them to sleep. If a player's alignment does not match the colour of their character token, turn it upside-down. You may wish to remind them that their alignment has not changed.

If characters are swapped note that no abilities are refreshed. This means once per game abilities can not be used again, and first night characters do not learn new information.

Each time **Constantine** is targeted by an ability that detects or affects good characters, choose what alignment Constantine registers as. (Do whatever is appropriate, such as showing a **Kermit the Frog** token, nodding, giving finger signals, or allowing an ability to work that would normally only affect a good Townsfolk).

## EXAMPLES

**Constantine** chooses to swap Fred, who is **Pepe the Prawn**, and Velma, who is **Swedish Chef**. Velma is now **Pepe the Prawn** and does not learn any information. Fred is now playing **Swedish Chef**. Fred was not non-verbal on the first day and so is woken later that night to learn that there are fewer **Humans** in play.

**Constantine** chooses to swap the alive **Camerman** with the dead **Animal** that already used their ability. Now, there is an alive good **Animal** with no ability and a dead evil **Camerman** with no ability.

**Constantine** is chosen by **The Great Gonzo**. Instead of killing **Constantine**, the Storyteller chooses to register **Constantine** as **Kermit the Frog**. This means they register as a Townsfolk and **The Great Gonzo** dies.

# ANIMAL

MINION

Once per game, at night\*, choose a player: they die. If you were non-verbal on the 1<sup>st</sup> day, one of their Townsfolk neighbours becomes Human.

*“BEAT DRUMS! BEAT DRUMS!”*

## HOW TO RUN

On the first day, observe if **Animal** is non-verbal and place the NON-VERBAL reminder token next to them if they were.

Each night except the first, wake **Animal**. They either shake their head no or point at any player. Put **Animal** to sleep.

If **Animal** chose a player, that player dies: mark them with the DIED TONIGHT reminder token. If **Animal** was non-verbal on the first day, choose one of the chosen player's Townsfolk neighbours to become a **Human**. **Animal** loses their ability—mark them with the NO ABILITY reminder token and remove their night token from the night sheet. (**Animal** won't wake again.)

If you forget whether they were non-verbal or not, wake them at night and ask by showing them the NON-VERBAL fabled token. They must answer honestly, then go to sleep.

## EXAMPLES

- On the first day, **Animal** communicated only in gestures and was non-verbal. That night, **Animal** chooses to kill **Sam the Eagle**, who dies. **Sam the Eagle** neighbours **Scooter** then **Beaker** on one side and **Sweetums** on the other. The Storyteller chooses to make **Beaker** a **Human**.
- On the first day, **Animal** communicated verbally to their and so their NON-VERBAL reminder token was not placed. On a later night, **Animal** chooses to kill **Dr. Teeth**, whose ability therefore doesn't work. No Townsfolk is turned into a **Human**.
- **Animal** is woken on the second night and chooses not to use their ability. On the third day **Animal** is executed and dies. **Constanine** swaps themselves and **Animal**. The now alive **Animal** can use their ability to kill the following night, however, the new **Animal** communicated verbally on the first day, so no **Human** is created.

# SCOOTER

MINION

If there are 5 or more players alive, once per day, you may choose to take a player off the block.

*“(Holds the clapboard the wrong way) Okay, Muppet Movie, Scenery 1A, Take One!!”*

## HOW TO RUN

After a nomination has occurred and a player is on the block, **Scooter** may publicly declare that they wish to use their ability to take the person off the block. Announce that the nominated player is no longer about to die and the nomination process continues as normal. If **Scooter** takes a player off the block, players that voted on that player can still die due to **Long John Silver's** ability.

If a player was previously on the block, they go back to being on the block.

**Scooter** loses their ability for the day – place **Scooter's** USED TODAY reminder token.

At dawn, remove the USED TODAY reminder token.

When less than 5 players live, place the NO ABILITY reminder token as **Scooter** can no longer take anyone off the block.

## EXAMPLES

There are 10 players alive so 5 votes are needed to execute. **Beaker** was about to die with 5 votes, but **Miss Piggy** is nominated and is put on the block with 6 votes, so now **Miss Piggy** is about to die. **Scooter** uses their ability to take **Miss Piggy** off the block. So, as before, **Beaker** is about to die with 5 votes, and the nomination process continues.

There are 6 players alive so 3 votes are needed to execute. **Rowlf the Dog** is nominated and receives 4 votes, then **Sweetums** is nominated and receives 3 votes. Scooter says “CUT!” to take **Rowlf the Dog** off the block. There is no one on the block as **Sweetums** was not previously on the block. Another player then decides to nominate **Scooter** and every alive player votes. Scooter cannot save themselves as they have already used their ability today. **Scooter** is executed and dies.

# MISS PIGGY

DEMON

**Each night\*, choose a player: they die. Townsfolk chosen by Kermit the Frog might become Humans instead. [+ Kermit the Frog]**

*“Women are like bacon, they smell good, they probably taste good, and they will kill you slowly.”*

## HOW TO RUN

While setting up the game, before putting character tokens in the bag, if **Kermit the Frog** is not already in play, remove a Townsfolk character token and add the **Kermit the Frog** character token.

When setting up the Grimoire, remember to put Miss Piggy's CORRUPTED token next to **Kermit the Frog**. **Kermit the Frog**'s ability might now turn Townsfolk chosen into a **Human** (see the **Kermit the Frog** entry for more information).

Each night except the first, wake **Miss Piggy**. **Miss Piggy** points at any player. Put **Miss Piggy** to sleep. The chosen player dies: put **Miss Piggy**'s DIED TONIGHT reminder by the chosen player's character token in the Grimoire and put a shroud on it.

At dawn, declare which player(s) died at night. (Do not say how they died.)

## EXAMPLES

During the night, **Miss Piggy** wakes and chooses a player. They player dies.

During the night, **Miss Piggy** wakes and chooses **Dr. Teeth**. **Dr. Teeth** was chosen earlier that night by **Animal** and so is already dead and their ability doesn't work. There is only one death that night.

**Kermit the Frog** selects a player who is a Townsfolk. **Miss Piggy** is in play so the Storyteller decides to turn the selected player into a **Human**.

# UNCLE DEADLY

DEMON

**Each night\*, choose a player: they die. Townsfolk who nominate you become Human immediately.**

*“I swore I would never perform here again, nor would anyone else. I will drive you all from this theatre. LEAVE OR BE DOOOOOOOOOOOMED!”*

## HOW TO RUN

Each night except the first, wake **Uncle Deadly**. **Uncle Deadly** points at any player. Put **Uncle Deadly** to sleep. The chosen player dies: put **Uncle Deadly**'s DIED TONIGHT reminder token by the chosen player's character token in the Grimoire and put a shroud on it.

At dawn, declare which player(s) died at night. (Do not say how they died.)

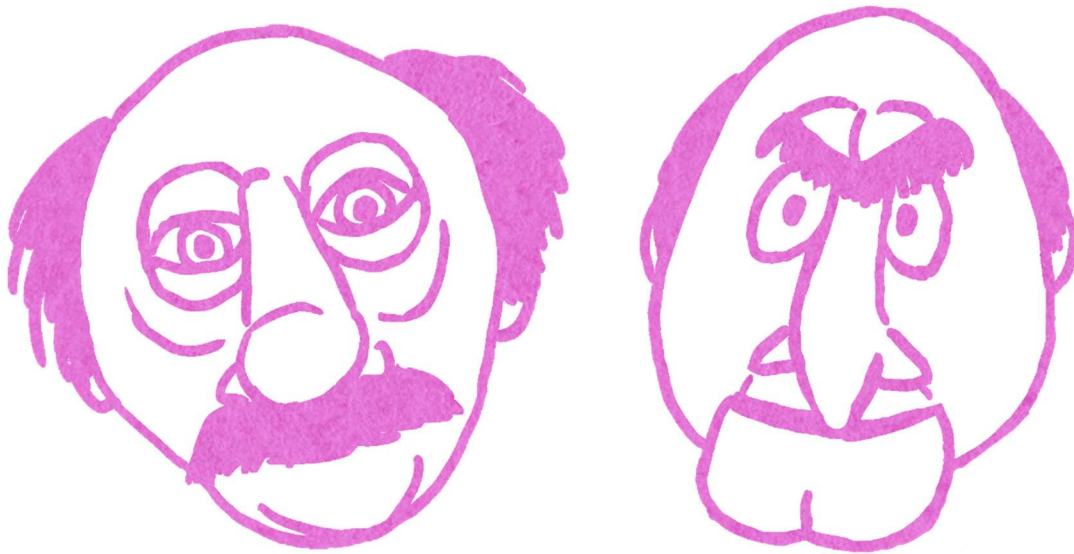

During nominations, if **Uncle Deadly** is nominated by a Townsfolk, place a HUMAN reminder token. They immediately become a **Human**.

## EXAMPLES

During the night, **Uncle Deadly** wakes and chooses a player. The chosen player dies.

On the first day **Uncle Deadly** is nominated by **Scrooge**. **Scrooge** is an Outsider and therefore nothing happens.

On the second day **Uncle Deadly** is nominated by **Fozzie Bear** who immediately becomes a **Human** and receives false information about their joke that night. Neither **Uncle Deadly** or the player that thinks they are **Fozzie Bear** learn of this change.

## STATLER & WALDORF

DEMON(S)

**STATLER:** Each night\*, wake with Waldorf, together choose one player: they die. [+ Waldorf, -1 Minion]

**WALDORF:** Each night\*, wake with Statler, together choose one player: they die. [+ Statler]

*WALDORF: "They aren't half bad."  
STATLER: "Nope, they're ALL bad!"*

### HOW TO RUN

**Statler** and **Waldorf** are twin Demons, who together choose one player to kill.

While setting up the game, before putting character tokens in the bag, remove one Minion token and ensure that both the **Statler** and **Waldorf** tokens are in the bag.

On the first night, wake **Statler** and show them **Waldorf's** token and point at the corresponding player. Then show them any Minions and 3 bluffs as normal. Send **Statler** to sleep. Wake **Waldorf** and show them **Statler's** token and point at the corresponding player. Then show them any Minions and 3 bluffs as normal. Send **Waldorf** to sleep. **Statler** and **Waldorf** do not have to receive the same 3 bluffs.

Each night except the first, wake **Statler** and **Waldorf** together. They both point at any player. When they agree and both point at the same player, put them both to sleep. The chosen player dies: put **Statler** and **Waldorf's** DIED TONIGHT reminder token by the chosen player's character token in the Grimoire and put a shroud on it.

At dawn, declare which player(s) died at night. (Do not say how they died.)

The good team can't win until both **Statler** and **Waldorf** are dead.

### EXAMPLES

One the first day **Statler** is executed and dies. On the second night, **Statler** and **Waldorf** still both wake together and each point at different players. The Storyteller gives each an exacerbad look until they both point at same player. That player dies.

## BIG BIRD

TRAVELLER

**You are the tallest player.**

*“Show your true colours. Mine is yellow.”*

## HOW TO RUN

Traveller players may join the game at any time, and may leave the game at any time.

If they are evil, they learn who the Demon(s) are; they do not learn any additional evil characters or receive any bluffs.

**Big Bird** must be the tallest player.

If **Big Bird** isn't the tallest player, whether accidentally or not, they are cheating. Remember it is important to address negative behaviour sooner rather than later. As **Big Bird** is a Traveller, they can be removed from the game if they continue to cause issues. It is up to Storyteller discretion to decide how lenient they wish to be.

## EXAMPLES

**Big Bird** climbs on furniture and stretches up to be the tallest player. They are exiled like a normal traveller and decide to climb back down. They are no longer the tallest player and are not required to be.

**Big Bird** piggy backs on another player to be taller. That player puts **Big Bird** down, meaning they are no longer the tallest player. The storyteller pulls **Big Bird** for a private conversation and reminds them of the rules of the game. They continue to cheat and are removed from the game.

# COOKIE MONSTER

TRAVELLER

All players must share their snacks with you.

*“No cry because cookie is finished. Smile because cookie happened.”*

## HOW TO RUN

Traveller players may join the game at any time, and may leave the game at any time. If they are evil, they learn who the Demon(s) are; they do not learn any additional evil characters or receive any bluffs.

All players must share their snacks with the **Cookie Monster**. It's pretty self-explanatory.

## EXAMPLES

**Cookie Monster** eats all the snacks other players brought.

# COUNT VON COUNT

TRAVELLER

You conduct and count each vote.

*“One. AH AH AH. Two. AH AH AH.”*

## HOW TO RUN

Traveller players may join the game at any time, and may leave the game at any time. If they are evil, they learn who the Demon(s) are; they do not learn any additional evil characters or receive any bluffs.

When a player is nominated and everyone is voting on whether or not to execute them **Count Von Count** takes the place of the storyteller to conduct the vote. They move their hand from the nominated player in a clockwise direction, counting votes when a player's hand is up when **Count Von Count**'s hand reaches them.

The vote must still be conducted in line with the rules of the game.

## EXAMPLES

A player is nominated. **Count Von Count** stands in the middle counting the vote. As they reach each raised hand, they announce the number votes followed by “AH AH AH.”. They announce whether or not there are enough votes for the nominated players to be on the block.
